

COLLOIDAL SILVER

"We now know what 'wealth' is. Wealth is the ability to regenerate life. How many people can you take care of for how many days?" - Buckminster Fuller

Imagine having your own hospital. Not just any hospital either.

After all, the mortality rate generally drops when hospitals go on strike. Death due to toxic drugs, unnecessary treatment, rampant ignorance and a sea of antibiotic-resistant bacteria make most hospitals the Devil's own playground.

No, I'm talking about a hospital that makes people well again.

Now, imagine that your new hospital is essentially cost free, works anywhere and is the size of a transistor radio, neatly fitting in your shirt pocket. Impossible? Not at all. The only thing unbelievable about it is that every American doesn't already have one.

The "hospital" I am talking about is a Colloidal Silver generator.

Silver is a powerful, natural prophylactic/antibiotic, used for thousands of years. Ancient Greeks lined their eating and drinking vessels with silver, as did many other cultures throughout the world.

Pioneers of the American West would put a silver dollar in a jug of milk to keep it fresh without refrigeration.

Did you ever wonder why silverware was made from silver?

One of the properties of silver is that it kills bacteria on contact in six minutes or less. It may be that gold and silver were first used as valued currency because of their medical properties.

Dr. Robert O. Becker, "The Body Electric," recognized a correlation between low silver levels and sickness. He said silver deficiency was responsible for the improper functioning of the immune system. Dr. Becker's experiments conclude that silver works on the full spectrum of pathogens without any side effects or damage to the body. He also states

that silver does more than kill disease-causing organisms. It also causes major growth stimulation of injured tissues.

Burn patients and even elderly patients notice more rapid healing. And he discovered that all cancer cells can change back to normal cells. All strains of pathogens resistant to other antibiotics are killed by silver.

Colloidal Silver works as a catalyst, disabling the enzyme that all one celled bacteria, fungi and viruses use for their oxygen metabolism. In short, the bad guys suffocate. Unlike with antibiotics, resistant strains have never been known to develop.

In fact, antibiotics are only effective against perhaps a dozen forms of bacteria and fungi, but never viruses. Because no known disease-causing organism can live in the presence of even minute traces of the chemical element of metallic silver.

Colloidal Silver is effective against more than 650 different disease-causing pathogens.

Since there is not enough room to list all the diseases against which Colloidal Silver has been used successfully, here is a tiny sample: acne, allergies, appendicitis, arthritis, blood parasites, bubonic plague, burns (colloidal silver is one of the few treatments that can keep severe burn patients alive), cancer, cholera, conjunctivitis, diabetes, gonorrhea, hayfever, herpes, leprosy, leukemia, lupus, lymphangitis, Lyme disease, malaria, meningitis, parasitic infections both viral and fungal, pneumonia, rheumatism, ringworm, scarlet fever, septic conditions of the eyes, ears, mouth and throat, shingles, skin cancer, staph infections, strep infections, syphilis, toxemia, trenchfoot, all forms of viruses, warts and stomach ulcer.

In addition it also has veterinary uses, such as for canine parvo virus. You'll also find Colloidal Silver very handy in the garden since it can be used against bacterial, fungal and viral attacks on plants. Simply spray diluted Colloidal Silver on the leaves, and add to soil water.

It would appear highly unlikely that even germ warfare agents could survive an encounter with Colloidal Silver, since viruses like E Bola and Hanta, or even the dreaded "flesh-eating bacteria" are, in the end, merely hapless viruses and bacteria.

To top it off, Colloidal Silver is virtually non-toxic, making it safe for both children and adults, as well as pets.

In short, anything bigger than a one-cell animal seems to like it.

So why haven't you heard of it?

I suspect the user friendly economics of Colloidal Silver may have something to do with it.

It is a safe and reliable alternative to expensive pharmaceuticals.

Sadly, some Colloidal Silvers currently on the market have as little as 1 part per million (ppm) and sell for as much as \$60.00 for eight ounces. However, get your own generator and produce unlimited amounts of high-quality Colloidal Silver concentrate. And for only 1/10th of a cent per gallon, plus the price of water!
